

Subject Index to Volume 40

A

A23187

hyperpolarization and vasorelaxation induced by, hyperkalemia and, H760

Acetylcholine

cerebrovascular response to age dependence of, in pigs, H535
in cocaine-treated rabbits, H1576
in NOS knockout mice, H1145
depressor responses to, effects of pressor agents on, H273
and oxygen release in exocrine pancreas, H1
preconditioning with, in rat heart, H23
regulation of calcium currents in rabbit atrioventricular node cells, H2274
response to, in reactive hyperemia in humans, H1594
vasorelaxation induced by cerebral, H126
chemotactic peptide and, H2405

α_1 -Acid glycoprotein

and erythrocyte aggregation, H2346

Acidosis

cerebral, during intermittent focal cerebral ischemia, nitric oxide synthase inhibition and, H588
myocardial contractile depression in, Org-30029 effects on, H1829
and transient outward potassium current in cardiomyocytes from diabetic rats, H2154

Actin

microfilaments, disruption, and sulfonylurea-inhibitory gating of cardiac K_{ATP} channels, H2710

Actin cytoskeleton, *see* Cytoskeleton

Action potentials

in atrial cells
model of, for rabbits, H1666
sodium/calcium exchange and, in humans, H1151
cardiac
and chronic hypoxia, H1856
duration, in cardiac hypertrophy, H2360
discontinuous conduction, at Purkinje-ventricular muscle junction, H1507
in mammalian myocardium, H1423
repolarizing, differences between left and right ventricles, H548

Acute-phase proteins

and erythrocyte aggregation, H2346

Acute respiratory distress syndrome

neutrophils in, C-reactive protein and, H507

Adenosine

and cardiac output during exercise, H1125
cardiac production of, 5'-nucleotidase and, H2162
and glycolysis, in working hearts, H2116
inhibition of leukocyte-induced vasoconstriction, H2622
and local and conducted vasomotor responses in cerebral arterioles, H1109

and myocardial oxygen consumption, H1384
and permeability of coronary arterioles, H1099
in postischemic attenuation of leukocyte adhesion and emigration, H2052
protective effect against ischemic injury in endothelium, H1801
in working hearts, H2116
response to, in reactive hyperemia in humans, H1594

Adenosine 3',5'-cyclic monophosphate

in cholinergic regulation of cardiac calcium currents, H2274
in maxadilan-mediated arterial relaxation, H924
metabolism, effect of neuropeptide Y on, H1878
negative inotropic effect of carbachol and, H404
and prostaglandin-induced pial artery dilation, H166
and vasorelaxation, in heart failure, in rats, H2228

Adenosine diphosphate

differential effects on cytosolic and membrane-bound 5'-nucleotidase activity, H2162

Adenosine monophosphate

differential effects on cytosolic and membrane-bound 5'-nucleotidase activity, H2162

Adenosine receptors

A_1
in direct preconditioning of cardiomyocytes, H1769
myocardial, activities during development, H235
 A_2
activation, inhibition of neutrophil-mediated injury to coronary endothelium, H1456
myocardial, activities during development, H235
 A_{2a} , on neutrophils, and inhibition of PMN-induced vasoconstriction, H2622

Adenosine-regulating enzymes

cardioprotection and, H1004

Adenosine 5'-triphosphate

see also Potassium channels, ATP-sensitive

and local and conducted vasomotor responses in cerebral arterioles, H1109
red blood cell-derived, and vascular nitric oxide synthesis, H2717
synthesis, in diabetic heart, H192

Adenylyl cyclase

activation, by forskolin, H1473
negative inotropic effect of carbachol and, H404

Adhesion molecules

see also Platelet endothelial cell adhesion molecule-1; Selectins
ICAM-1, inhibition, and myocardial ischemia/reperfusion injury, H2421

Adrenal glands

angiotensin II receptor regulation in, H440

α -Adrenergic receptors

α_1 -

agonists, positive inotropic effect, H937
blockade, and myocardial blood flow in humans, H1302
cardiac, inotropic responsiveness, exercise and, H2599
cardiac, regulation by norepinephrine, H1762
in cerebral arteries, developmental changes in, H2313
stimulation, and cardiac tolerance to hypoxia, H1356
subtypes mediating inotropic and electrophysiological effects in mammalian myocardium, H1423
 α_{1B} , gene expression, oxygen and, H1599

α_2 -

in regulation of digital perfusion, H2007
in stress-induced vasoconstriction, H1375
activation of chloride conductance in iris arterioles, H2469
and cardiac output during exercise, H1125
interactions with vasopressin, H1307

β -Adrenergic receptors

β_1 -

cardiac, regulation by norepinephrine, H1762
transgenic mice overexpressing, heart rate variability in, H1465

β_2 -

cardiac, regulation by norepinephrine, H1762
in dilation of conductance coronary arteries, H1926
transgenic mice overexpressing, cardiac response to sympathetic activation in, H630
and effect of neuropeptide Y on endothelial barrier function, H1878
skeletal muscle, and phosphate metabolism abnormalities in heart failure, H1739
stimulation
cardiac contractile response to, adenosine and, H235
and myocardial contractility, nitric oxide and, H2646

Adrenomedullin

activity in chronically hypoxic lungs, H622

Aging

and cardiomyocyte death, H1215
and diurnal heart rate variability, H303
and response to air-jet stress, in rats, H768

Albumin

porcine serum, flux from isolated coronary arterioles, H1099

Almitrine

effects on cardiac action potentials in chronic hypoxia, H1856

Amino acids

excitatory, and cerebral blood flow, H990

 γ -Aminobutyric acid receptors

and baroreceptor inputs to nucleus of solitary tract, H931

Angiogenesis

in chronic myocardial ischemia, H713
postnatal coronary, thyroid disorders and, H1746
vasodilation and, H753

Angiotensin-converting enzyme

cardiac, activity, in vivo and in vitro, H417
inhibition
cardioprotective effects, H1340
and cardiovascular remodeling, H906
pulmonary isozyme, H744
secretion, H744
vascular activity, in hyperlipidemia, H1065

Angiotensin II

see also **Renin-angiotensin system**
and adult feline cardiocyte growth in culture, H29
in brain, and sympathetic baroreflex in rabbit ventrolateral medulla, H1015
cardiac, and infarct healing, H1040
and 8-epiprostaglandin $F_{2\alpha}$ formation in vascular smooth muscle cells, H159
formation, in canine heart, pathways, H417
and hemorrhage in hypertensive rabbits, H1531
in hypertension produced by chronic inhibition of nitric oxide synthase, H806
pulmonary vascular response to, in canine pacing-induced heart failure, H222
and Ras expression in cultured rat vascular smooth muscle cells, H595
and regulation of angiotensin II receptor in hypertension, H120
and renal and lumbar sympathetic activity, in sodium-deprived rats, H2591
and renal hemodynamics, in rats with myocardial infarction, H2306

Angiotensin II receptors

AT₁
and activation of Ras in cultured rat vascular smooth muscle cells, H595
density, in SHR aortic myocytes during proliferation, H2330
in hypertension, H120
and renal hemodynamics, in rats with myocardial infarction, H2306
AT₂
density, in SHR aortic myocytes during proliferation, H2330
and renal hemodynamics, in rats with myocardial infarction, H2306
density, in SHR aortic myocytes, H2330
regulation, in adrenal gland, H440
vascular, tissue specific expression during pregnancy, H212

Angiotensinogen

expression and localization of, in rat heart, after MI, H1040

Anion exchange

effects on intracellular pH and tension in basilar artery of dogs, H1912

Antiarrhythmic drugs

class III, H1207

Antioxidants

endogenous, and hydrogen peroxide-induced leukocyte rolling, H614

 α_1 -Antitrypsin

and erythrocyte aggregation, H2346

Aorta

α_{1B} -adrenergic receptor expression in, oxygen and, H1599
depressor nerves, baroreflex frequency-response characteristics, H2218
intramural strain distribution in, change due to smooth muscle contraction and relaxation, H1711

Apnea

effects on cardiovascular response to neck suction during exercise, H1370

Apoptosis

cardiomyocyte, aging and, H1215

Aprikalim

and cerebral vasodilation, H126

Aquaporin

AQ-1, inhibition in vivo, H2254

Arachidonic acid

metabolism, tetrahydrobiopterin autoxidation and, H738

Arginase

activity, in endothelial cells, H1988

Arginine

L-
and hemodynamic effects of oxygen in hemorrhagic shock, H203
in ovine endotoxemia, H1296
analogues
and cerebral hypercapnic vasodilation, H1498
and feedback inhibition of nitric oxide release in endothelium, H2045
in lung ischemia/reperfusion model, H1970

Arginine vasopressin, see Vasopressin**Arrhythmias**

induction and maintenance, in dogs, regional and functional factors determining, H148
prevention, myocardial glycogen depletion for ischemic preconditioning and, H2283
proarrhythmic and antiarrhythmic actions of ion channel blockers on, H329
reentrant, drug therapy for, H329
reperfusion-induced, effect of n-3 fatty acids on, H1483
in reperfusion injury, H823
sinus, and atrial repolarization during reflex-mediated alterations in vagal tone, H870

Arteries

α_{1B} -adrenergic receptor gene expression in, H1599
cerebral, see **Cerebral arteries**
coronary, see **Coronary arteries**
inward rectifier potassium currents, H697
resistance
C-fiber activation and, H969
endothelial function, in heart failure, H469
tonometry, H2399
wave reflections in, analysis, H1807

Arterioles

see also **Microvasculature**

adaptation to intestinal artery occlusion, H914

adrenergic depolarization of, in rat iris, H2469

cerebral

dilation by superoxide, hydrogen peroxide, and peroxyntirite, H1262
endothelial injury in, vitamin E and, H637
hypercapnic vasodilation, K_{ATP} channels in, H1498
local and conducted vasomotor responses in, H1109
response to bradykinin, in cocaine-treated rabbits, H1576

coronary

nitroglycerin effects on, H461
postnatal growth, H1746
protein flux from, H1099
development, stimulation by vasodilation, H753
dilation, during functional hyperemia, H387
epineural, reactivity to vasopressin, in rats, H1307
fibroblast growth factor-induced dilation, nitric oxide and, H1087
rat iris, activation of chloride conductance in, H2469
resistance, vasorelaxation in, VIP-induced, in situ, H282
response to sympathetic nerve activity, nitric oxide and, H860

Arteriovenous anastomoses

in rabbit ear model of digital perfusion, H2007

Arteriovenous fistula

endothelium-dependent relaxation in veins proximal to, nitric oxide and, H668

Atherogenesis

hyperlipidemia-induced, activity of vascular angiotensin-converting enzyme in, H1065

Atherosclerosis

lysophosphatidylcholine activation of phospholipase D and, H1706

Atipamezole

effects on arteriovenous anastomoses in rabbit ear model of digital perfusion, H2007

Atrial fibrillation

induction and maintenance, in dogs, regional and functional factors determining, H148

Atrial natriuretic factor

overexpression, coronary vascular function and, H2368
secretion, hypoxia- or stretch-stimulated, K_{ATP} channels and, in isolated rat heart, H2339

Atrioventricular node

cells, calcium currents, regulation by acetylcholine, H2274

Autonomic nervous system

activity, during hemorrhage in hypertensive rabbits, H1531
cardiac
denervation, parasympathetic negative inotropic supersensitivity after, H435
developmental changes in, H706
cardiac activity, H1302
in brain-damaged rabbits, H410

- effects of aging and sex difference, H303
- fetal, H1333
- in cardiovascular control, H38
- cardiovascular control, quantitative study in humans, H1240
- failure, heart rate and blood pressure variability with, H1555
- heart rate regulation by, H44
- bidirectional augmentation, H288
- in response to air-jet stress, in aging rats, H768
- Autoregulation**
 - and nitroglycerin effects on coronary microcirculation, H461
 - role of oxygen in, H602
- B**
- Baroreceptors**
 - aortic, resetting to hypotension and to hypertension, viscoelastic mechanisms, H1407
- Baroreflexes**
 - and abdominal venous distension, in dogs, H1049
 - aortic, frequency-response characteristics, H2218
 - arterial, regulation of heart rate and nerve activity
 - exercise and, H1840
 - gender differences in, H1840
 - in blood pressure control, H812
 - carotid-cardiac
 - slowing, in exercise, H1363
 - slowing, in orthostasis, H1363
 - stimulation, apnea and, H1370
 - carotid sinus
 - frequency-response characteristics, H2218
 - and resistance to venous return, H1022
 - response to abdominal venous distension, in dogs, H1049
 - coronary vasoconstriction caused by, central pathways, H1079
 - function
 - central aspects of, rat model for, H2218
 - in physically active postmenopausal women, H455
 - human, quantitative study of, H1240
 - neural arc, optimization of dynamic arterial pressure regulation, H882
 - paraventricular nucleus-induced inhibition of heart rate, galanin in, H1823
 - sensitivity, and carotid artery elasticity, in humans, H1139
 - sympathetic, in rabbit brain, angiotensin II and, H1015
 - sympathetic discharges during hypoxia, frequency and amplitude of, H2563
- Basilar artery**
 - dilatation, subarachnoid hemorrhage and, H126
 - endothelium-dependent contractions in, tetrahydrobiopterin and, in dogs, H738
 - intracellular pH and tension in, anion exchange and, in dogs, H1912
- Bezold-Jarisch reflex**
 - 5-HT₃ receptors of nucleus of solitary tract in, H80

- Bifurcation analysis**
 - of antiarrhythmic drug actions, H329
- Bimakalim**
 - cold perfusion of, protection of cardiac function ex situ, H1884
- Bioenergetics**
 - in perfused myocardium, H1166
- Blood**
 - perfusate, for isolated working rabbit heart, H784
- Blood flow**
 - see also Hemodynamics*
 - cerebral, *see Cerebral blood flow*
 - coronary, *see Coronary blood flow*
 - digital
 - arteriovenous anastomoses in, H2007
 - rabbit ear model of, H2007
 - gastric, effects of hemodilution on, H1849
 - hepatic, ultrasound measurement of, in conscious rats, H2701
 - with intestinal artery occlusion, H914
 - local control, in rat muscle, H387
 - measurement, ultrasound technique, H2701
 - myocardial
 - α_1 -adrenergic receptor blockade and, H1302
 - effects of cardiac contraction and coronary sinus pressure elevation on, H1433
 - positron emission tomography analysis, H59
 - neural, in rats, H1307
 - portal, ultrasound measurement of, in conscious rats, H2701
 - pulmonary
 - increased, and endothelial function, in lambs, H562
 - perinatal ventilation-induced changes, potassium channels and, H2353
 - regional
 - in hypoxia, nitric oxide and, H1182
 - metabolic autoregulation, oxygen and, H602
 - renal, in response to air-jet stress, in aging rats, H768
 - response to spinotrapezius muscle exercise, in rats, H2730
 - and venous nitric oxide production, H668
- Blood pressure**
 - see also Hemodynamics; Hypertension; Hypotension; Shock*
 - arterial
 - in ANF-transgenic mice, H2368
 - carotid-cardiac baroreflex and, H1363
 - heart rate-based control of, H812
 - in obese rabbits, H373
 - during Valsalva maneuver, H1240
 - ventilatory influence on, transfer function analysis in rat, H2108
 - ascending aortic-carotid pressure transfer function, arterial model for, H2399
 - in hemorrhagic shock, oxygen effects on, H203
 - measurement, H2399
 - neural control of, H812
 - nonlinear analysis of, H396
 - power spectral analysis, H2108
 - power spectrum analysis, in rats, H1416

- prolonged elevation, effects on depressor responses to acetylcholine, H273
- radiotelemetry, in rats, H1728
- in rat renovascular hypertension, endothelin antagonism and, H88
- reduction, by heme oxygenase substrates, in hypertensive rats, H1132
- regulation, nonlinear analysis of, H396
- in response to air-jet stress, in aging rats, H768
- response to neck suction, apnea and, H1370
- variability
 - coarse graining spectral analysis, in patients with autonomic failure, H1555
 - power spectral analysis, in fetal lambs, H1333
- Blood vessels**
 - structure, in rat renovascular hypertension, endothelin antagonism and, H88
- Bosentan**
 - and blood pressure and vascular structure, in renovascular hypertension, H88
 - and portal resistance after endotoxemia, H1953
- Bradycardia**
 - hypovolemic, vasopressin receptors and, H1057
- Bradykinin**
 - cerebrovascular response to, in cocaine-treated rabbits, H1576
 - metabolism, species differences in, H1340
 - vasorelaxation induced by, hyperkalemia and, H760
- Brain**
 - see also Cerebral blood flow*
 - angiotensin II in, and sympathetic baroreflex in rabbit ventrolateral medulla, H1015
 - cytochrome P-450 arachidonic acid ep-oxygenase, inhibition, effects on cerebral blood flow, H1541
 - damage, rabbit model, heart rate variability in, during artificial ventilation and apnea, H410
 - nitric oxide synthase activity in, hypercapnic cerebral blood flow and, H2035
 - nucleus ambiguus, parasympathetic cardiac neurons in, firing properties of, H2609
 - ouabain, and sympathoexcitatory and pressor responses to sodium, H103
 - parabrachial nucleus, in reflex coronary vasoconstriction, H1079
 - paraventricular nucleus, baroreflex inhibition of heart rate, galanin in, H1823
- Breath holding**
 - effects on cardiovascular response to neck suction during exercise, H1370
- Burn**
 - cardiac dysfunction with, cellular basis for, H2615
- 2,3-Butanedione monoxime**
 - cold perfusion of, protection of cardiac function ex situ, H1884

2,3-Butanedione monoxime

(continued)

- effects on energy depletion injury of ventricular myocytes, H643
- myocardial contractile depression in, Org-30029 effects on, H1829
- protective effect in ischemic myocardium, H2515

C**Cadmium**

- and conduction at Purkinje-ventricular muscle junction, H1507

Caffeine

- effects on energy depletion injury of ventricular myocytes, H643

Calcitonin gene-related peptide

- activity in chronically hypoxic lungs, H622
- blood levels, left ventricular, ET-1 and, H2246
- and cerebral vasodilation, H126
- effects on neurogenic responses in rat small arteries, H969
- tissue levels, in lung, ET-1 and, H2246

Calcium ATPase

- sarcoplasmic reticulum, gene expression exercise and, H68
- phorbol 12-myristate 13-acetate and, H1031

Calcium-calmodulin

- and oxygen release in exocrine pancreas, H1
- and thrombin-stimulated preproendothelin-1 transcription, H1918

Calcium channels

- see also **Calcium currents**
- oxygen-sensitive, in arterial myocytes, H2290
- in vascular smooth muscle, H1912

Calcium currents

- see also **Calcium channels**
- inactivation, in overdrive suppression of rabbit sinoatrial node, H2097

L-type

- and discontinuous conduction at Purkinje-ventricular muscle junction, H1507
- in rabbit atrioventricular node cells, H2274
- in rabbit atrioventricular node cells, regulation by acetylcholine, H2274

Calcium ionophore

- vasorelaxation induced by, hyperkalemia and, H760

Calcium ions

- and chloride conductance in rat iris arterioles, H2469
- cycling, in metabolically inhibited ventricular myocytes, H643
- cytoplasmic, in endothelium, and microvessel permeability, H2377
- cytosolic
 - in aortic myocytes during proliferation, H2330
 - in pressure-overload cardiac hypertrophy, in rats, H228
- homeostasis, in cardiomyocytes isolated from heat-shocked rats, H1938
- influx, and microvessel permeability, H2377

intracellular

- in cardiomyocytes, and postischemic reperfusion injury, H2145
- in cardiomyocytes, phosphatidic acid and, H651
- in cardiomyocytes, reloading during rest, H1814
- in maxadilan-mediated arterial relaxation, H924
- and oxygen release in exocrine pancreas, H1
- and pulsus alternans in pressure-overload cardiac hypertrophy, H2490
- in resting cardiomyocytes, H896
- during vasorelaxation, H962
- and inward rectifier potassium currents, H697
- and preproendothelin-1 transcription in endothelium, H1918
- ryanodine-sensitive release from sarcoplasmic reticulum, preconditioning and, H876
- sarcoplasmic reticulum handling of, in heart failure, H850
- sensitivity, of myofilaments, contractile effects, H1829
- sensitization to, effects on cardiomyocyte contractile behavior, H357
- stores, in aortic myocytes during proliferation, H2330
- transport, in diabetic heart, H192

Calcium sensitizers

- mechanism of action, H51

Calcium transients

- EMD-53998 and, in normal and ischemic heart, H311

Calponin

- phosphorylation, in arterial homogenate, H776

Capillaries**see also Microvasculature**

- erythrocyte flux in, during maturation, H2263
- leukocyte plugging of, and ischemia/reperfusion injury in skeletal muscle, H2653
- oxygen tension in determination, H365
- heterogeneity, H365
- perfusion-induced fluid filtration, hypercholesterolemia and, H1755

Capillary filtration coefficient

- in isolated canine lung, H222

Capillary permeability

- in rats, H2254
- vascular endothelial growth factor and, H2520

Capsaicin

- effects on neurogenic responses in rat small arteries, H969

Captopril

- and cardiovascular remodeling, H906

Carbachol

- and compartmental cAMP and PKA, in perfused rat hearts, H404
- negative inotropic effect
- in perfused rat hearts, H404
- in transplanted human ventricle in vivo, H435

Carbohydrate

- metabolism, myocardial, with increased work, in diabetic swine, H2320

Carbon monoxide

- heme-derived, in hypertension, H1132

Cardiac hypertrophy

- catecholamine-induced, transient outward current in, H2360
- chronic hypoxia and, H1856
- myocyte contractile dysfunction during, microtubules and, H1978
- in obese rabbits, H373
- pressure- or volume-overload, and passive stiffness in isolated cardiomyocytes, H2575
- pressure-overload
 - impaired calcium handling in, H228
 - microtubules in, H1978
 - pulsus alternans in, H2490
- renin-angiotensin system in, H906
- prostaglandins in, H2197
- sympathetic nervous system and, H1547

Cardiac output**see also Hemodynamics**

- and antihypertensive effect of vasopressin in spontaneous hypertension, H1728
- limitation, during exercise, H1125
- and venous return, H1022

Cardiomyocytes

- adenosine-activated potassium currents, glibenclamide inhibition of, H2430
- β -adrenergic regulation of repolarization in, development and, H1174
- adult feline, growth in culture, H29
- adult mouse, isolation of, H1250
- atrial, model of, H1666
- binucleation, during murine development, H2183
- calcium-depleted sarcoplasmic reticulum, reloading during rest, H1814
- carnitine palmitoyltransferase in, IGF-I and, H422
- contractile function
 - during cardiac hypertrophy, microtubules and, H1978
 - in heart failure, endothelin and, H2629
 - measurement, H357
- contraction
 - economy of, with positive inotropic interventions, H357
 - and growth in culture, H29
- cytoskeletal disruption, and sulfonylurea-inhibitory gating of cardiac K_{ATP} channels, H2710
- death, aging and, H1215
- delayed rectifier potassium current, slow component, in rabbit, H2477
- from diabetic rats, transient outward potassium current in, H2190
- direct preconditioning, via adenosine A_1 receptor and K_{ATP} channel, H1769
- DNA synthesis, during murine development, H2183
- dysfunction, after burn injury, H2615
- endothelin effects in, H2629
- endothelin production in, H2629
- energy production, in postischemic myocardium, H687
- excitation-contraction coupling in, H1449
 - sodium current in, H674
- human, action potential, sodium/calcium exchange and, H1151
- hypertrophy, PGF_{2 α} -induced, H2197
- hypoxic, oxygen diffusion in, H1734
- intracellular calcium

- and contractility, TNF- α effects on, H1449
 phosphatidic acid and, H651
 isolated
 doxorubicin-induced oxidative stress in, H2079
 from heat-shocked rats, calcium homeostasis in, H1938
 passive stiffness, effects of pressure- or volume-overload hypertrophy on, H2575
 strain, H2575
 stress, H2575
 maximal velocity of unloaded shortening, H1778
 mechanical properties, effects of adenosine and protein kinase C stimulation on, H1778
 neutrophil adhesion to, after burn injury, H2615
 osmotic fragility, protection against, by nitric oxide donors, H428
 oxygen consumption, measurement, H357
 oxygen level, and metabolic recovery in postischemic myocardium, H687
 protection by sarcoplasmic reticulum calcium depletion, H643
 reduplication, during murine development, H2183
 resting, length, actomyosin interaction and, H896
 sodium/calcium exchange in, oxygen-derived free radicals and, H823
 sodium current maturation, H541
 stiffness, estimation of, H2575
 subcellular compartmentalization of G_{α} in, H2209
 terminal differentiation, during murine development, H2183
 tolerance to hypoxia, α_1 -adrenergic stimulation and, H1356
 unstimulated, myofilament interaction in, H896
 voltage-activated potassium currents, regulation, H1609
- Cardiomyopathy**
 in diabetes, H192, H2126
- Cardioprotection**
see also Ischemic preconditioning
 heat shock-mediated, H1938
 in ischemic myocardium, by inhibition of contracture, with BDM, H2515
 with ischemic preconditioning, H1004
 with monophosphoryl lipid A, H1004
 in physically active postmenopausal women, H455
 second window of protection, H2723
- Cardiopulmonary bypass**
 heparin administration for, effects on fibrinolytic activity and platelet function, H528
- Cardiovascular control**
 central command in, H38
 during exercise, H244
 GABA receptors in, H931
 investigation, nonlinear analysis in, H396
 muscle reflex in, H38
 quantitative study in humans, H1240
- Cardiovascular system**
 endothelial dysfunction, in heart failure, H469
 structure, and heart failure, H469
- Carnitine palmitoyltransferase**
 in cardiomyocytes, IGF-I and, H422
- Carotid artery**
 active renin and renin glycoform dynamics in, H184
 calponin phosphorylation in, H776
 elasticity, baroreflex sensitivity and, in humans, H1139
- Carotid sinus**
 baroreflex frequency-response characteristics, H2218
- Catalase**
 and hydrogen peroxide-induced leukocyte rolling, H614
- Catecholamines**
 cardiac hypertrophy induced by, transient outward current in, H2360
- Cats**
 cranial window preparation, H1498
 tissue hypoxia, and abdominal visceral afferent activation during ischemia, H261
- Cell cycle**
 regulation, in cardiomyocytes, H2183
- Cell death**
 in aging rat heart, H1215
 programmed, *see Apoptosis*
- Cell migration**
 monocyte, hypoxia-induced, H2025
- Cell swelling, *see* Cell volume**
- Cell volume**
 in myocardial ischemia, sodium transporters and, H94
- Cerebral arteries**
 noradrenergic-mediated contraction, developmental changes in, H2313
- Cerebral blood flow**
 acetylcholine-induced pial artery dilation, in NOS knockout mice, H1145
 brain P-450 arachidonic acid epoxygenase and, H1541
 cocaine and, H1576
 hypercapnic, and nitric oxide synthase activity in brain and endothelium, H2035
 hypoxia-induced pial artery dilation, vasopressin and opioids in, H521
 NMDA-induced changes in, nitric oxide synthase inhibition and, H990
 prostaglandin-induced pial artery dilation, cyclic nucleotides and, H166
 regional, response to hypercapnia, N^G -nitro-L-arginine and, H1717
 after subarachnoid hemorrhage, H126
- Cerebral circulation**
 vasodilation, hypercapnia-induced, age dependence of, in pigs, H535
- Ceruloplasmin**
 and erythrocyte aggregation, H2346
- Cesium ions**
 and inward rectifier potassium currents, H697
- Chemotactic peptide**
 and acetylcholine-induced vasorelaxation, H2405
- Chlorethylclonidine**
 effects in mammalian myocardium, H1423
- Chloride ions**
 conductance, in rat iris arterioles, H2469
- Cholinesterase**
 metabolism of acetylcholine, and effects of pressor agents on depressor responses to acetylcholine, H273
- Chronotropism**
 forskolin and, H1473
- Chymase-like enzymes**
 cardiac, activity, in vivo and in vitro, H417
- Circadian rhythm**
 of heart rate variability, effects of aging and sex difference, H303
- Circulation**
 collateral, effects of cardiac contraction and coronary sinus pressure elevation on, H1433
 mesenteric, in endotoxemia, in sheep, H1296
 splanchnic, in endotoxemia, H1325
 systemic
 depulstation, sympathetic nerve activity and, in goats, H15
 pulsatile and nonpulsatile, sympathetic nerve activity in, in goats, H15
- Cocaine**
 cerebrovascular effects, H1576
 effects on bradykinin-induced dilation of pial arterioles, H1576
- Collateral circulation**
 effects of cardiac contraction and coronary sinus pressure elevation on, H1433
- Collateral vessels**
 in chronic myocardial ischemia, H713
 development, with intestinal artery occlusion, H914
 enlargement, wall shear rate and, H914
- Complement system**
 activation, tissue injury due to, heat stress and, H571
- Compliance**
 arterial, H1022
 three-element windkessel model for, linear and nonlinear formulations of, H2661
 venous, H1022
- Computed tomography**
 for assessment of regional myocardial blood flow, H1643
- Congenital heart disease**
 with increased pulmonary blood flow, and endothelial function, in lamb model, H562
- Congestive heart failure, *see* Heart failure**
- Coronary arteries**
 conductance, and β_2 -adrenergic dilation of, H1926
 direct effects of nitric oxide on, in vivo, H1584
 EDHF-mediated hyperpolarization and relaxation in, H760
 endothelium, reperfusion-induced dysfunction, H842
 inward rectifier potassium currents, H697
 occlusion
 electrical activation and deformation of left ventricle during, H2411
 response to K_{ATP} channel modulators during, epicardial and endocardial differences in, H140
 vasodilation, nitric oxide-induced, H1584
- Coronary artery disease**
 myocardial perfusion-oxidative metabolism mismatch in, H59

Coronary blood flow

- see also **Coronary arteries**
 collateral vessels in, vasomotor responses of, H490
 direct effects of nitric oxide on, in vivo, H1584
 effect of length and contraction of cardiac muscle on, H447
 endothelial function in, ischemic preconditioning and, H1801
 during exercise, H1125
 and myocardial oxygen consumption, H1384
 velocity, direct effects of nitric oxide on, in vivo, H1584

Coronary exchange capacity

- changes, mechanisms of, H1099

Coronary microcirculation

- permeability, adenosine and, H1099
 postnatal development, neonatal thyroid disorders and, H1746
 responses to endothelin-1, 17 β -estradiol and, H1117

Coronary perfusion pressure

- and myocardial oxygen demand, H320
 nitroglycerin-induced increase, H2447

Coronary sinus pressure

- and left ventricular function, H834
 and myocardial water content, H834

Coronary vasculature

- function, in ANF-transgenic mice, H2368
 nitroglycerin-induced vasoconstriction in, H2447
 NO-dependent hyperpermeability, VEGF-induced, H2735
 vasoconstriction, α -adrenergic receptors and, H1302

C-reactive protein

- effects on lung permeability increases, H507
 and erythrocyte aggregation, H2346

Critical ring size

- and arrhythmias, H329

Cyclic nucleotides

- and prostaglandin-induced pial artery dilation, H166
 and vasorelaxation, in heart failure, in rats, H2228

N⁶-Cyclohexyladenosine

- effects on ischemic injury in working hearts, H2116

Cyclooxygenase

- activity, tetrahydrobiopterin autooxidation and, H738
 and cerebrovascular function in cocaine-treated rabbits, H1576

Cyclosporin A

- regulation of nitric oxide synthase endothelial expression, H1072

Cytochrome-c oxidase

- copper, redox state, effects on cerebral oxygen utilization, H579

Cytochrome P-450

- arachidonic acid epoxidase, cerebral, inhibition, effects on cerebral blood flow, H1541

Cytokines

- effects on intracellular calcium and contractility in isolated cardiomyocytes, H1449
 and microcirculation, in rats, H1186

Cytoskeleton

- cardiomyocyte, disruption, and sulfonylurea-inhibitory gating of cardiac K_{ATP} channels, H2710

D**Defibrillation**

- efficacy, determinants of, H1094
 guinea pig model, H2536
 unsuccessful shock in, recurrent appearance of protective zones after, H1491

Deoxyribonuclease

- DNase I, and sulfonylurea-inhibitory gating of cardiac K_{ATP} channels, H2710

Development

- cerebral artery, and noradrenergic-mediated contraction, H2313

Diabetes mellitus

- cardiac potassium channel function in, metabolic basis of, H2190
 cardiomyocytes in, transient outward potassium current in, H2154, H2190
 cardiomyopathy in, H192, H2126
 myocardial carbohydrate metabolism in, with increased work, in pig, H2320
 myocardial compliance in, exercise and, H2126
 vascular dysfunction in, F₂-isoprostane formation and, H159

Diapedesis

- monocyte, in hypoxia, H2025

Diocetanolglycerol

- effects on mechanical properties of cardiomyocytes, H1778

Diphenylenediamine

- protective effect against osmotic fragility in reoxygenated cardiomyocytes, H428

Dofetilide

- mechanism of action, H1207

Dopamine β -hydroxylase

- in left ventricular hypertrophy, H1547

Doxorubicin

- cardiotoxicity, oxidative mechanism of, H2079

Drug delivery

- computational simulations, H2014

Drug diffusion

- computational simulations, H2014

Ductus arteriosus

- fetal, tone, nitric oxide and cGMP system in regulation of, H2638

E**Echocardiography**

- color Doppler M mode, diastolic trans-mitral pressure differences from, H1267

Edema

- lymph, in extremities, H173
 myocardial, acute transient coronary sinus hypertension and, H834

Elastase

- neutrophilic, and microvascular injury in postischemic skeletal muscle, H1947

Electroencephalography

- NMDA-induced changes in, nitric oxide synthase inhibition and, H990

Electron probe X-ray microanalysis

- of rabbit aorta, H514

Electrophysiology

- α_1 -adrenergic receptor subtypes mediating, in mammalian myocardium, H1423
 of atrial fibrillation, in animal model, H148
 of electrical defibrillation efficacy, H1094
 of right ventricular and left ventricular epicardium, heterogeneity, H548
 of sodium channels, H498
 of ventricular fibrillation, H1491
 of working rabbit heart, H784

EMD-53998

- effects on calcium-pressure relationship in guinea pig heart, H311
 inotropic mechanism in myocardium, H1394

EMD-57033

- effects on contraction and energetic demand of cardiomyocytes, H357
 functional effects in isolated rabbit heart, H51

Endocardium

- Purkinje-ventricular muscle junction, discontinuous conduction at, H1507
 response to K_{ATP} channel modulators, during regional ischemia, H140

Endothelial cells

- see also **Leukocytes; Neutrophils**

- arginase activity in, H1988
 borders, permeability-related changes at, revealed by lectin binding, H2547
 human coronary, lysophosphatidylcholine activation of phospholipase D in, H1706
 NADPH oxidase expression in, H1626
 nitric oxide release, somatostatin and, H2238
 nitric oxide synthase expression, regulation by cyclosporin A, H1072
 nitric oxide synthesis, in heart failure, in rats, H2228
 vascular
 acetylcholine-induced relaxation, FMLP and, H2405
 metalloprotease-mediated cleavage secretion of pulmonary angiotensin-converting enzyme, H744

Endothelin receptors

- estrogen levels and, H1999

Endothelins

- ET-1
 cardiopulmonary effects, in normoxia and hypoxia, H2246
 coronary microvascular responses to, 17 β -estradiol and, H1117
 production, calcium and, H1918
 receptor binding, estrogens and, H1999
 ET-3, receptor binding, estrogens and, H1999
 antagonism, in rat renovascular hypertension, H88
 effects, in cardiomyocytes, H2629
 production, in cardiomyocytes, H2629
 in regulation of portal resistance after endotoxemia, H1953

Endothelium

- barrier function
 effect of neuropeptide Y on, H1878
 hypercholesterolemia and, H1755

- calcium influx, and microvessel permeability, H2377
- coronary, neutrophil-mediated injury, inhibition by adenosine A₂-receptor activation, H1456
- in coronary collateral vasomotion, H490
- function, with increased pulmonary blood flow, in lambs, H562
- injury in cerebral arterioles, vitamin E and, H637
- neutrophil adhesion to, and PMN-induced vasoconstriction, H2622
- nitric oxide release from, feedback inhibition of, H2045
- nitric oxide synthase activity in feedback inhibition of, H2045
- hypercapnic cerebral blood flow and, H2035
- preproendothelin-1 transcription in, calcium-dependent signal transduction in, H1918
- protection against ischemic injury, ischemic preconditioning and, H1801
- reactivity, in ANF-transgenic mice, H2368
- reperfusion-induced dysfunction, preconditioning and, H842
- in resistance arteries, function in heart failure, H469
- tetrahydrobiopterin and, H738
- and venular myogenic response in rat skeletal muscle, H267
- Endothelium-derived relaxing factor**

and arterial baroreflex regulation of heart rate and nerve activity, H1840
- in diurnal heart rate variability, H303
- Gene expression**
angiotensin AT₁ receptor, in reduced renal mass hypertension, H120
- angiotensin AT_{1A} receptor, in adrenal gland, H440
- angiotensin AT_{2A} receptor, in adrenal gland, H440
- α_{1B}-adrenergic receptor, oxygen and, H1599
- inducible nitric oxide synthase, inhibition by heat shock proteins, H2529
- minK, in rabbit heart, H2477
- mitochondrial cytochrome oxidase, in aging F344 rats, exercise and, H68
- myosin, posttranscriptional regulation, in cardiac cultures, H2584
- NADPH oxidase, in endothelial cells, H1626

Gene expression (*continued*)

- nitric oxide synthase, in endothelial cells, regulation by cyclosporin A, H1072
- sarcoplasmic reticulum calcium ATPase, phorbol 12-myristate 13-acetate and, H1031
- SERCA2a gene
 - in aging F344 rats, exercise and, H68
 - in cultured neonatal rat heart cells, H1031

Gene regulation

- angiotensin II receptor subtype, in adrenal gland, H440

Glibenclamide

- and acetylcholine-mediated preconditioning, in rats, H23
- inhibition of ATP-sensitive potassium channels, in guinea pig atrial myocytes, H2430
- and ischemic preconditioning, in rats, H23

Glucose

- metabolism
 - in obese rabbits, H373
 - proton production from, H2116
- oxidation
 - in hypertrophied rat heart, H798
 - in postischemic myocardium, H2060
- serum, elevation, and F₂-isoprostane formation in vascular smooth muscle cells, H159
- uptake, in diabetic pig heart, H2320

Glucose transporters

- GLUT-1, in diabetic pig heart, H2320
- GLUT-4, in diabetic pig heart, H2320

Glutathione

- and hydrogen peroxide-induced leukocyte rolling, H614

Glycogen

- and ischemic preconditioning, in rat heart in vivo, H2283

Glycolysis

- in diabetic pig heart, H2320
- in hypertrophied rat heart, postischemic, H798

G proteins

- and effect of neuropeptide Y on endothelial barrier function, H1878
- in endothelial nitric oxide pathway, H296

G_α

- in cardiomyocytes, redistribution in heart failure, H2209
- in cardiomyocytes, subcellular compartmentalization of, H2209
- and nitric oxide modulation of vascular reactivity, H253
- pertussis toxin-sensitive, in canine cardiac Purkinje fibers, H706
- sensitivity, muscarinic potassium channels and, H379

Gregg effect

- mechanisms involved in, H984

Growth factors

- and F₂-isoprostane formation in vascular smooth muscle cells, H159

Growth hormone

- effect on cardiac dynamics, H1721
- replacement, in hypophysectomized rats with myocardial infarction, H1721

GTP-binding proteins, see G proteins**Guanabenz**

- effects on sympathoexcitatory and pressor responses to sodium, in SHR, H103

Guanosine 3',5'-cyclic monophosphate

- and cerebral vasodilation, H126
- in cholinergic regulation of cardiac calcium currents, H2274
- in C-type natriuretic peptide-induced vasorelaxation, in veins, H1907
- and fetal ductus arteriosus, H2638
- and prostaglandin-induced pial artery dilation, H166
- in pulmonary artery relaxation due to hydrogen peroxide, H1900
- in vasorelaxation, H962
- and vasorelaxation, in heart failure, in rats, H2228

Guanosine triphosphate-binding proteins, see G proteins**Guanylate cyclase**

- activation, in pulmonary artery relaxation due to hydrogen peroxide, H1900
- and cerebral vasodilation, H126

Guinea pig

- atrial myocytes
 - adenosine-activated potassium currents in, H2430
 - ATP-sensitive potassium channels in, H2430

H**Hamster**

- cheek pouch, resistance arterioles, VIP-induced vasorelaxation in, H282
- ischemia/reperfusion injury, in dorsal skinfold chamber, H2388

Haptoglobin

- and erythrocyte aggregation, H2346

Heart

exercise, vasodilation and muscle pump contribution to, H1697
- reactive, ATP-sensitive potassium channel activation and, H1594
- Hyperglycemia**
and F₂-isoprostane formation in vascular smooth muscle cells, H159
- Hyperkalemia**
effects on EDHF-mediated hyperpolarization in coronary arteries, H760
- Hyperlipidemia**
activity of vascular angiotensin-converting enzyme in, H1065
- Hyperpolarizing factor**
endothelium-derived, H760
- Hypertension**
antihypertensive effect of vasopressin in, cardiac output and, H1728
- aortic baroreceptor resetting to, viscoelastic mechanisms, H1407
- arterial, and microvascular responses to ischemia/reperfusion, H2508
- blood pressure reduction by heme oxygenase substrates in, H1132
- cardiac α_1 -adrenergic inotropism in, exercise and, H2599
- coronary sinus, and left ventricular function, H834
- 1K,1C Goldblatt, in rats, endothelin antagonism in, H88
- 2K,1C Goldblatt, in rats, endothelin antagonism in, H88
- in obese rabbits, H373

Hypertension (*continued*)

- produced by chronic inhibition of nitric oxide synthase, angiotensin II in, H806
- prolonged, effects on depressor responses to acetylcholine, H273
- pulmonary, ET-1 and, H2246
- rat model, adrenergic agonist-induced vasoconstriction in, chronic exercise and, H977
- reduced renal mass, regulation of angiotensin II receptor in, H120
- regulation of angiotensin II receptor in, H120
- renin-angiotensin system in, H184
- renin response to hemorrhage in, H1524
- renovascular, endothelin antagonism in, in rats, H88

Hyperthermia, *see* **Heat stress****Hyperthyroidism**

- neonatal, effects on coronary arterioles, H1746

Hypotension

- aortic baroreceptor resetting to, viscoelastic mechanisms, H1407
- endotoxin-induced, heat shock proteins and, in rats, H2529
- hypovolemic, vasopressin receptors and, H1057
- right coronary, myocardial energetics during, H2300

Hypothyroidism

- neonatal, effects on coronary arterioles, H1746

Hypovolemia

- cardiovascular adaptation to, vasopressin receptors and, H1057

Hypoxemia

- myocardial adaptation to, dynamics of, H2300

Hypoxia

- see also* **Ischemia/reperfusion**
- and α_1 -adrenoreceptor expression, H1599
- arterial vasodilation in, oxygen-sensitive calcium channels in, H2290
- atrial natriuretic factor secretion stimulated by, K_{ATP} channels and, in isolated rat heart, H2339
- baroreflex sympathetic discharges during, frequency and amplitude of, H2563
- cardiac tolerance to, α_1 -adrenoreceptor stimulation and, H1356
- cardiopulmonary effects of ET-1 in, H2246
- chronic
 - and cardiac action potentials, H1856
 - and ventricular mass, H1856
- and nitric oxide production in neonatal pig lung, H8
- oxygen diffusion in cardiomyocytes during, H1734
- platelet endothelial cell adhesion molecule-1 phosphorylation induced by, H2025
- regulation of cerebral oxygen consumption in, and redox state of cytochrome-c oxidase copper, H579
- tissue, and abdominal visceral afferents during ischemia, H261
- transendothelial migration of monocytes induced by, H2025

Hysteresis

- of cardiac muscle, H1314

I**ICI-118551**

- and cardiac response to sympathetic activation, in transgenic mice overexpressing β_2 -adrenoreceptors, H630

Image processing

- computerized, H1229

Imaging

- for assessment of regional myocardial blood flow, H1643

Indo 1-acetoxymethyl ester

- for cytosolic calcium measurement, H228

Indomethacin

- cerebrovascular response to, age dependence of, in pigs, H535
- effects on coronary collateral flow, H490

Inflammation

- see also* **Acute-phase proteins**

- leukocyte rolling in, L- and P-selectin-dependent, velocity differences between, H2740
- skeletal muscle, leukocyte adhesion and emigration in, ischemic preconditioning and, H2052
- vascular permeability in, H2438, H2547
- in venules, lectin binding at endothelial cell borders in, H2547

In situ hybridization

- of renin and angiotensinogen, H1040

Inositol 1,4,5-trisphosphate

- reperfusion release, dietary fish oil and, H1483
- responses to, in cerebral arteries, developmental changes in, H2313

Inotropism

- α_1 -adrenoreceptor
 - in hypertension, exercise and, H2599
 - in mammalian myocardium, H1423
- forskolin and, H1473
- growth hormone and, H1721
- negative
 - of carbachol, in perfused rat hearts, H404
 - of carbachol, in transplanted human ventricle in vivo, H435
 - indirect, in transplanted human ventricle in vivo, H435
 - of TNF- α , H1449
- positive
 - of α_1 -adrenoreceptor agonists, H937
 - α_1 -adrenoreceptor subtypes mediating, H1423
 - calcium sensitivity and, H1829
 - cardiomyocyte contraction economy with, H357
 - ventriculoarterial coupling with, H1635

Insulin

- actions, in obese rabbits, H373
- and carnitine palmitoyltransferase synthesis in mitochondria, H422

Insulin-like growth factor

- IGF-I, and carnitine palmitoyltransferase in cardiomyocytes, H422

Integrins

- and vascular permeability alterations in inflammation, H2438

Intercellular adhesion molecules

- ICAM-1, inhibition, and myocardial ischemia/reperfusion injury, H2421

Interleukins

- IL-1, and microcirculation, in rats, H1186
- IL-6, and microcirculation, in rats, H1186

Intestinal artery occlusion

- early collateral and microvascular adaptation to, H914

Ion channel blockers

- efficacy, H329

Ion currents

- transient inward, in cardiomyocytes, H823
- transient outward
 - differing contributions in left and right ventricles, H548
 - in mammalian myocardium, H1423

Ischemia

- abdominal, abdominal visceral afferent activation during, H261
- left ventricular, electrical activation and deformation during, in dogs, H2411
- skeletal muscle, duration, and microvascular and tissue injury, H2388

Ischemia/reperfusion

activity, species differences in, H1340
- Kinase II**
activity, species differences in, H1340
- KN-62**
and calponin phosphorylation, H776
- Knockout mice, *see* **Mice, knockout****

L

- α -Lactalbumin**
flux, from isolated coronary arterioles, H1099
- Lactate**
production, in diabetic pig heart, H2320
- Lectins**
binding, at endothelial cell borders in inflamed venules, H2547
- Leukocyte adhesion**
and microvascular responses to ischemia/reperfusion, H2388, H2508
oxidized low-density lipoprotein and, H1795
postischemic, ischemic preconditioning and, H2052

Leukocytes

- capillary plugging by, and ischemia/reperfusion injury in skeletal muscle, H2653
- rolling
hydrogen peroxide-induced, in vivo, H614
L- and P-selectin-dependent, velocity differences between, H2740
postischemic, ischemic preconditioning and, H2052
P-selectin-dependent, in vivo, H614
and vascular permeability alterations in inflammation, H2438

Lipopolysaccharide, *see* **Endotoxin****Liposomes**

- vasoactive intestinal polypeptide encapsulated in, and vasorelaxation in hypertension in situ, H282

Liver

- blood flow, ultrasound measurement of, in conscious rats, H2701
hemodynamics, after endotoxemia, H1953

Local anesthetics

- interaction with lysophosphatidylcholine-modified cardiac sodium channels, H790

Losartan

- effects on angiotensin II receptor subtype gene expression, H440

Low-density lipoproteins

- oxidized, and microvascular response to ischemia/reperfusion, H2508

LPS, *see* **Endotoxin****Lung**

- blood flow
increased, and endothelial function, in lambs, H562
perinatal ventilation-induced changes, potassium channels and, H2353
chronically hypoxic, adrenomedullin and, H622
perinatal ventilation-induced vasodilation, potassium channels and, H2353
permeability increases, C-reactive protein and, H507
septal microvessel diameter in zone 1, in isolated rat lung, H996
- Lung injury**
acute, permeability increases in, C-reactive protein and, H507
reperfusion, nitric oxide and, H1970
vascular, neutrophils in, attenuation by C-reactive protein, H507

Lymphatics

- collecting, in rabbit hind leg, H173
initial, in rabbit hind leg, H173
tracheobronchial, histamine and, H2501

Lymph pump mechanics

- in rabbit hind leg, H173

Lysophosphatidylcholine

- activation of phospholipase D, in human coronary endothelial cells, H1706

M

Magnesium ions

- differential effects on cytosolic and membrane-bound 5'-nucleotidase activity, H2162

- and inward rectifier potassium currents, H697
regulation of cardiac adenosine production, H2162

Magnetic resonance imaging

- cardiac
of right ventricular midwall surface motion and deformation, H2677
of ventricular shape changes with mitral regurgitation, H2689
with intravascular indicator, residue functions of, modeling regional myocardial flows from, H1643

Mammary artery

- expression of angiotensin II receptor subtypes, in pregnancy, H212

Manganese superoxide dismutase

- activation, and cardiac tolerance to hypoxia, H1356

Mast cells

- activation, and vascular permeability alterations, H2438
in oxidized low-density lipoprotein-induced microvascular dysfunction, H1795

Mathematical modeling

- of heart rate effect on blood pressure, H812
for predicting end-capillary P_{O_2} in muscles at maximal oxygen consumption, H721
of right ventricular midwall surface motion and deformation, H2647
of three-dimensional changes in left and right ventricular geometry, in chronic mitral regurgitation, H2689
of vascular heparin distribution, H2014

Maxadilan

- recombinant, vasodilatory properties of, H924

Mean circulatory filling pressure

- stress and, H1375

Mechanical ventilation

- for analysis of ventilatory influence on systemic arterial pressure, in rats, H2108

Mechanotransduction

- of pressure stimulus, in isolated mesenteric arteries, H1517

Membrane attack complex

- assembly, heat stress and, in perfused rabbit heart, H571

Membrane currents

- in rabbit atrial cell, model of, H1666

Membrane potential

- see also* **Transmembrane potential**
 β -adrenergic modulation of, in canine cardiac Purkinje fibers, developmental changes in, H706
during vasorelaxation, H962

Mesenteric circulation

- in endotoxemia, in sheep, H1296
isolated arteries from, protooncogene expression in, pressure elevation and, H1517
in rats, H1416

Metabolism

- in avascular guinea pig retina, H1162
in postischemic myocardium, H2060

Metalloprotease

- in cleavage secretion of pulmonary angiotensin-converting enzyme, H744

Methodologies

- for arterial tonometry, H2399

Methodologies (continued)

- for canine pacing model of heart failure, H222
- for competitive reverse transcriptase polymerase chain reaction, in rat heart, after MI, H1040
- for confocal microscopy
 - of doxorubicin effects in isolated cardiomyocytes, H2079
 - in isolated rat lung, H996
- for determination of reflection sites in arterial system, H1807
- for direct measurement of microvessel permeability coefficients, H2520
- for electron probe X-ray microanalysis in rabbit aorta, H514
- for heart rate monitoring using telemetry, H1465
- for immunoelectron microscopy, of G_{α} in cardiomyocytes, H2209
- for intravital microscopy, in skeletal muscle, H2388
- for isoelectric focusing, in separation of renin glycoforms, H184
- for isolation of adult mouse cardiomyocytes, H1250
- for laser diffraction measurement of sarcomere length, H73
- for laser-Doppler flowmetry
 - in cerebral microcirculation, H1541
 - in hypercapnic cerebral blood flow, H2035
- for laser light erythroaggregometry, H2346
- for latex particle perfusion of pulmonary microcirculation, H996
- for left heart bypass, in goat, H15
- for measurement of cerebral microvascular perfusion, H1541
- for measurement of erythrocyte flow variables, H2263
- for measurement of regional myocardial blood flow, with unlabeled microspheres and Coulter Channelyzer, H1656
- for measurement of two-dimensional strain in rat left ventricles, H1256
- for microelectrodes, H1620
- for microinjections into nucleus of solitary tract, in rats, H80
- for microspectrophotometry, H1734
- for microspectroscopy, in exocrine pancreas, H1
- for microvascular studies in rabbit ear, H2007
- for myography in resistance arteries, H969
- for nuclear magnetic resonance spectroscopy, in isolated rat hearts, H94
- for organ culture, of arteries, H2462
- for phase-portrait maps of heart rate variability, H1465
- for positron emission tomography of myocardial blood flow and oxidative metabolism coupling, H59
- for quantification of solute flux per unit surface area and concentration gradient from arterioles, H1099
- for quantitative beat-to-beat analysis of heart rate during exercise, H244
- for transfer function analysis of ventilatory influence on systemic arterial pressure in rat, H2108
- for videomicroscopy, H1953
- for Wigner-Ville transformation of telemetric data on heart rate, H1465

N-Methyl-D-aspartate

- effects on cerebral blood flow and EEG, nitric oxide synthase inhibition and, H990

Mice

- cranial window preparation, H1717
- development, and temporal pattern of cardiomyocyte DNA synthesis and terminal differentiation, H2183
- knockout
 - NOS, acetylcholine responses in, H1145
 - type III NOS, regional cerebral blood flow response to hypercapnia in, H1717
- Nppc* gene, H1565
- reproductive organs, regulated C-type natriuretic peptide expression in, H1565
- transgenic, *see* **Transgenic mice**

Microcirculation*see also* **Microvasculature**

- cerebral
 - dilation by superoxide, hydrogen peroxide, and peroxynitrite, H1262
 - local and conducted vasomotor responses in, H1109
- coronary
 - growth factors and, in chronic myocardial ischemia, H713
 - nitroglycerin effects on, H461
- cutaneous, arteriovenous anastomoses, H2007
- cytokines and, in rats, H1186
- erythrocyte flux in, during maturation, H2263
- in ischemic injury in skeletal muscle, H1277
- nitric oxide effects on, H387
- oxygen transport, in exercise, H721
- pancreatic, oxygen transport in, H1 pulmonary, H996
- in sepsis, H1620
- in skeletal muscle, ischemic injury, H2388
- vasorelaxation in, VIP-induced, in situ, H282

Microfluorimetry

- isolation of adult mouse cardiomyocytes for, H1250

Microneurography

- in Valsalva maneuver, H1240

Microspheres

- unlabeled, in measurement of regional myocardial blood flow, H1656

Microvasculature*see also* **Arterioles; Capillaries; Venules**

- adaptation
 - to exercise, H2730
 - to intestinal artery occlusion, H914
- alveolar septal, in zone 1, estimated functional diameter, H996
- cardiac, permeability, adenosine and, H1099
- conjunctival, modeling, H1229
- dysfunction, in postischemic skeletal muscle, H1947
- elasticity, and erythrocyte flow, H2454
- fibroblast growth factor-induced dilation, nitric oxide and, H1087
- growth, H753

- neurogenic responses in, nitric oxide and, H969
- oxidized low-density lipoprotein-induced dysfunction, mast cells in, H1795
- oxygen tension in, heterogeneity, H365
- permeability
 - calcium influx and, H2377
 - hypercholesterolemia and, H1755
- in isolated lung, angiotensin II and, H222
- modulation by protein kinase C, through nitric oxide synthase, H1702
- in postischemic skeletal muscle, H1947
- and pulmonary ischemia/reperfusion, H1970
- vascular endothelial growth factor and, H2520
- response
 - to ischemia/reperfusion, oxidized low-density lipoproteins and, H2508
 - to sympathetic nerve activity, nitric oxide and, H860

minK gene

- expression in rabbit heart, H2477

Mitochondria

- cardiomyocyte, carnitine palmitoyl-transferase synthesis in, IGF-I and, H422

Mitochondrial cytochrome oxidase

- gene expression, in aging F344 rats, exercise and, H68

Mitogen-activated protein kinase

- and Ras expression in cultured rat vascular smooth muscle cells, H595
- tyrosine phosphorylation of, H1348

Modeling in physiology

- for analysis of heart rate-based control of arterial blood pressure, H812
- of antiarrhythmic effects of ion channel blockers, H329
- of arrhythmogenesis, H329
- of atrial cell, H1666
- of conjunctival microvessels, H1229
- for derivation of ascending aortic-carotid pressure transfer function, H2399
- of digital perfusion, H2007
- mathematical, for predicting end-capillary PO_2 in muscles at maximal oxygen consumption, H721
- model clamp technique, application to synchronization of rabbit sinoatrial node cells, H2168
- of neural baroreflex arc optimization of dynamic arterial pressure regulation, H882
- of regional myocardial flows and volumes, H1643
- of right ventricular midwall surface motion and deformation, H2677
- of three-dimensional changes in left and right ventricular geometry, in chronic mitral regurgitation, H2689
- of unstable radii in muscular blood vessels, H2669
- of vascular heparin distribution, H2014

Monocytes

- transendothelial migration, hypoxia-induced, H2025

N^G-Monomethyl-L-arginine

effect on microvessel constriction in response to sympathetic nerve activity, H860

effects on cerebral vasodilator response to hypercapnia, H1498

and pulmonary microvascular permeability after ischemia/reperfusion, H1970

and venous contraction, H668

Monophosphoryl lipid A

cardioprotection with, H1004

in myocardial preconditioning against infarction, H2723

3-Morpholinocarbonyl-L-phenylalanine

protective effect against osmotic fragility in reoxygenated cardiomyocytes, H428

- in left ventricular hypertrophy, H1547

Neutral endopeptidase

- activity, species differences in, H1340

Neutrophilic elastase

- and microvascular injury in postischemic skeletal muscle, H1947

Neutrophils

- adhesion to cardiomyocytes, after burn injury, H2615
- adhesion to endothelium
 - inhibition by adenosine, H1456
 - and PMN-induced vasoconstriction, H2622
- coronary endothelial injury mediated by, inhibition by adenosine A₂-receptor activation, H1456
- and endothelial barrier dysfunction with hypercholesterolemia, H1755
- vascular lung injury induced by, attenuation by C-reactive protein, H507

Newborn

- cardiac Purkinje fibers, sodium-potassium pump activity, in dogs, H706
- hypoxia-induced pial artery dilation, opioids and vasopressin in, H521
- mammalian, cerebral arteries, noradrenergic-mediated signal transduction in, H2313
- perinatal ventilation-induced pulmonary vasodilation, potassium channels and, H2353
- pig, hypoxia, and nitric oxide production in lung, H8
- prostaglandin-induced pial artery dilation, cyclic nucleotides and, H166

Nicorandil

- response to, during regional ischemia, epicardial and endocardial differences in, H140

Nitric oxide

- and aortic ring reactivity to vasoconstrictors, H253
- and arteriolar response to sympathetic nerve activity, H860
- cerebrovascular response to, age dependence of, in pigs, H535
- in cholinergic regulation of cardiac calcium currents, H2274
- direct effects on coronary circulation, in vivo, H1584
- endothelium-derived
 - and hypoxic vasodilation of resistance vessels in humans, H1182
 - modulation in canine femoral veins, H668
 - and norepinephrine-induced vasoconstriction after exercise, H977
 - in pulmonary hypertension, in lambs, H562
 - in reactive hyperemia in humans, H1594
 - synthesis, vanadate and, H296
 - and fetal ductus arteriosus, H2638
 - and fibroblast growth factor-induced vasodilation, H1087
- flow-dependent formation, and β_2 -adrenergic dilation of conductance coronary arteries, H1926
- and hemodynamic effects of oxygen in hemorrhagic shock, H203
- and hydrogen peroxide-induced leukocyte rolling, H614
- inactivation, tetrahydrobiopterin autooxidation and, H738
- inhibition of pulmonary artery catalase, H1900
- and lung reperfusion injury, H1970
- modulation of mitochondrion-mediated oxidative stress, H1893
- and myocardial contractility, H2646

- and neurogenic responses in microvessels, H969
- production in neonatal pig lung, hypoxia and, H8
- regulation of endothelium-dependent vasodilator responses, H133
- in regulation of portal resistance after endotoxemia, H1953
- release from endothelium, feedback inhibition of, H2045
- synthesis
 - in heart failure, in rats, H2228
 - vascular, red blood cell-derived ATP and, H2717
- and VEGF effects in coronary venules, H2735
- venular, shear-dependent release, H387

Nitric oxide donors

- protective effect against osmotic fragility in reoxygenated cardiomyocytes, H428

Nitric oxide synthase

- activity in brain and endothelium, hypercapnic cerebral blood flow and, H2035
- endothelial expression, regulation by cyclosporin A, H1072
- inducible
 - expression, inhibition by heat shock protein, H2529
 - induction, and arginase activity in endothelial cells, H1988
- inhibition
 - cerebrovascular response to, age dependence of, in pigs, H535
 - chronic, hypertension produced by, angiotensin II in, H806
 - during intermittent focal cerebral ischemia, H588
 - and myocardial contractility, H2646
 - and NMDA-induced changes in cerebral blood flow, H990
 - potentiation of hypoxic vasoconstriction, H8
 - and pulmonary microvascular permeability after ischemia/reperfusion, H1970
 - and venous return in porcine endotoxemia, H1325
- knockout mice, cerebrovascular response to acetylcholine in, H1145
- in modulation of microvascular permeability by protein kinase C, H1702
- negative feedback regulation of, H133
- in veins, H668

Nitroglycerin

- coronary arteriolar dilation by, H461
- coronary vasoconstriction induced by, H2447
- and myocardial oxygen consumption, H1384
- relaxation of rat tail artery by, mechanisms, H962

N^ω-Nitro-L-arginine

- effects on cerebral vasodilator response to hypercapnia, H1498
- and NMDA-induced changes in cerebral blood flow, H990

N^ω-Nitro-L-arginine

- effects on coronary collateral flow, H490

N^ω-Nitro-L-arginine methyl ester

- effects on portal resistance after endotoxemia, H1953
- hypertension produced by, angiotensin II in, H806

- and nitric oxide production in neonatal pig lung, H8
and pulmonary microvascular permeability after ischemia/reperfusion, H1970
- ^{N^G}-Nitro-L-arginine methyl ester**
effects on intracellular pH in brain, during intermittent focal cerebral ischemia, H588
and hemodynamics, in ovine endotoxemia, H1296
and venous return in porcine endotoxemia, H1325
- Norepinephrine**
and adrenergic receptor subtype regulation in heart, H1762
 α_1 -adrenergic stimulation by, and cardiac tolerance to hypoxia, H1356
effects on arteriovenous anastomoses in rabbit ear model of digital perfusion, H2007
reuptake, in left ventricular hypertrophy, H1547
vasoconstriction induced by, effects of chronic exercise on, H977
and venular myogenic response in rat skeletal muscle, H267
- Nppc gene**
isolation and mapping, H1565
regulated expression of, H1565

Phencyclidine

and inward rectifier potassium currents, H697

Phenylephrine

effects on arteriovenous anastomoses in rabbit ear model of digital perfusion, H2007

suppression of outward potassium currents, in atrial myocytes, H937
vasoconstriction induced by, effects of chronic exercise on, H977

R-Phenylisopropyladenosine

effects on mechanical properties of cardiomyocytes, H1778

Phorbol 12-myristate 13-acetate

and sarcoplasmic reticulum calcium ATPase gene expression, H1031

Phosphates

high-energy, stability in right ventricle, H320

metabolism, skeletal muscle, abnormalities in heart failure, H1739

Phosphatidic acid

effects on intracellular free calcium and cardiac contractile force, H651

Phosphodiesterase

in cholinergic regulation of cardiac calcium currents, H2274

Phospholipases

PLD, lysophosphatidylcholine activation of, PKC and, H1706

Phosphorescence quenching

in oxygen tension measurement, H365

Physical training, see Exercise training**Placental trophoblastic cells**

mitochondrion-mediated oxidative stress, modulation by nitric oxide, H1893

Plasminogen

activation, heparin administration and, in vivo, H528

Platelet-activating factor

in platelet endothelial cell adhesion molecule-1 phosphorylation, H2025
and vascular permeability alterations in inflammation, H2438

Platelet-derived growth factor

and 8-epiprostaglandin $F_{2\alpha}$ formation in vascular smooth muscle cells, H159

Platelet endothelial cell adhesion molecule-1

phosphorylation, hypoxia-induced, H2025

Platelets

activation by protein kinase C antibody, H2134

aggregation, protein kinase C antibody and, H2134

function, heparin effects on, in vivo, H528

secretion, protein kinase C antibody and, H2134

surface protein phosphorylation and dephosphorylation, H2134

Poincaré plot

of heart rate variability, H244

Polylysine-gadolinium-diethylenetriaminepentaacetic acid

in imaging assessment of regional myocardial blood flow, H1643

Positron emission tomography

for assessment of regional myocardial blood flow, H1643
of myocardial blood flow, H1302

Potassium channels

see also **Potassium currents**

ATP-sensitive

activation, and reactive hyperemia, H1594

activation, in endothelial protection against ischemic injury, H1801

activation, vasodilator responses to, H126

arginine analogues and, H1498

and atrial natriuretic factor secretion in isolated rat heart, H2339

cardiac, sulfonylurea-inhibitory gating of, H2710

in cerebral vasodilation by hydrogen peroxide and peroxynitrite, H1262

in cultured arterial segments, H2462

in direct preconditioning of cardiomyocytes, H1769

endocardial, H140

epicardial, H140

glibenclamide inhibition of, in cardiomyocytes, H2430

and late myocardial preconditioning against infarction, H2723

oxygen free radicals and, H478

and protection of cardiac function during hypothermia, H1884

in rat heart, H23

calcium-activated

in coronary arteries, H760

in venous relaxations to C-type natriuretic peptide, H1907

calcium-sensitive, in cerebral vasodilation by superoxide, H1262

delayed rectifier, and ischemic preconditioning, H1207

muscarinic, structure and function, H379

and perinatal pulmonary vasodilation, H2353

Potassium currents

see also **Potassium channels**

adenosine-activated, glibenclamide inhibition of, in cardiomyocytes, H2430

delayed rectifier

in canine ventricular epicardium, developmental changes in, H1174

in rabbit vascular smooth muscle, inhibition by PKC, H109

slow component, in rabbit ventricular myocytes, H2477

inward rectifier

in coronary artery smooth muscle cells, H697

glibenclamide inhibition of, in cardiomyocytes, H2430

outward

in atrial myocytes, suppression by phenylephrine, H937

in cultured human atrial myocytes, H1609

transient outward, in cardiomyocytes from diabetic rats, H2154, H2190

voltage-activated, differential regulation in cultured atrial myocytes, H1609

Potassium ions

in rabbit aorta vascular smooth muscle cells, H514

Prazosin

and arteriovenous anastomoses in rabbit ear model of digital perfusion, H2007

and cardiac output during exercise, H1125

Pregnancy

tissue specific expression of vascular smooth muscle angiotensin II receptor subtypes in, H212

Pressor agents

effects on depressor responses to acetylcholine, H273

Pressure-flow relationship

in collateral circulation, H1433

Progesterone

effects on coronary microvascular responses to endothelin-1, H1117

Prostacyclin

synthesis, in uterine artery, angiotensin II receptor subtype expression and, H212

Prostaglandins

PGF_{2α}

induction of cardiomyocyte hypertrophy, H2197

and local and conducted vasomotor responses in cerebral arterioles, H1109

release, in isolated rat heart, H2447

PGI₂, see **Prostacyclin**

and cerebrovascular function in cocaine-treated rabbits, H1576

and fetal ductus arteriosus, H2638

in FMLP inhibition of acetylcholine-induced vasorelaxation, H2405

Prostanoids

and cardiomyocyte growth, H2197
cerebrovascular response to, age dependence of, in pigs, H535

Protein kinases

PKA

in cholinergic regulation of cardiac calcium currents, H2274

and effect of neuropeptide Y on endothelial barrier function, H1878

negative inotropic effect of carbachol and, H404

and sodium current maturation in cardiomyocytes, H541

PKC

antibody, activation of human platelets by, H2134

and calponin phosphorylation, H776

effects on delayed rectifier potassium current, in rabbit vascular smooth muscle, H109

in lysophosphatidylcholine activation of phospholipase D, H1706

membrane-bound, inhibition, and activation of human platelets, H2134

modulation of microvascular permeability through nitric oxide synthase, H1702

in platelet endothelial cell adhesion molecule-1 phosphorylation, H2025

pseudosubstrate peptides, H2134

and sarcoplasmic reticulum calcium ATPase gene expression, H1031

and sodium current maturation in cardiomyocytes, H541

PKG

in cholinergic regulation of cardiac calcium currents, H2274

and VEGF effects in coronary venules, H2735

calcium-dependent, and preproendothelin-1 transcription in endothelium, H1918

cGMP-dependent, *see* **Protein kinases, PKG**

mitogen-activated
and Ras expression in cultured rat
vascular smooth muscle cells, H595
tyrosine phosphorylation of, H1348

Protein tyrosine kinase

pathway, cross talk with myosin light
chain kinase pathway, H1348

Protein tyrosine phosphatase

in endothelial nitric oxide pathway,
H296

Protons

intracellular, modulation of transient
outward potassium current in car-
diomyocytes from diabetic rats,
H2154

Protooncogenes

c-fos, expression in cultured rat vas-
cular smooth muscle cells, H595
expression, pressure elevation and,
H1517

ras, expression in cultured rat vascular
smooth muscle cells, H595

Puerperium

tissue specific expression of vascular
smooth muscle angiotensin II re-
ceptor subtypes in, H212

Pulmonary artery

catalase, inhibition by nitric oxide,
H1900

elastance, H1287

pressure

Serotonin

and vascular permeability alterations
in inflammation, H2438

Serotonin receptors

5-HT₃, of nucleus of solitary tract, in
Bezold-Jarisch reflex, H80

Sex steroids

and endothelin receptor modulation,
H1999

Shock

circulatory, *see* **Shock, hemorrhagic**

Shock (continued)

- hemorrhagic
 - hemodynamic effects of oxygen in, H203
 - L-selectin blockade in, effects on reperfusion injury, H1871
- septic
 - circulatory effects, mechanisms, H1325
 - heat shock proteins and, in rats, H2529

Single photon emission computed tomography

- for assessment of regional myocardial blood flow, H1643

Sinoatrial node

- cell synchronization, model clamp technique for, H2168
- overdrive suppression of, calcium current inactivation and, H2097

Skin

- massage, and lymph flow rates, in rabbit hind leg, H173

Sodium, dietary

- deprivation, and sympathetic nerve activity in rats, H2591
- intake, sympathoexcitatory and pressor responses to, in SHR, H103
- restriction, and angiotensin II receptor regulation in adrenal gland, H440

Sodium/calcium exchange

- and action potential of atrial myocytes, H1151
- in cardiomyocytes, oxygen-derived free radicals and, H823

Sodium channels

see also **Sodium currents**

- cardiac muscle, electrophysiology, H498
- and cell volume, in rat heart, H94
- chimeric, electrophysiology, H498
- lysophosphatidylcholine-modified cardiac
 - burst openings, H790
 - QX-222 blockade of, H790
- skeletal muscle, electrophysiology, H498

Sodium currents

see also **Sodium channels**

- and cardiac ventricular contraction, in cats, H674
- development in atrial tumor myocytes, regulation, H541

Sodium/hydrogen antiport

- and cell volume, in rat heart, H94

Sodium/hydrogen exchange

- in cardiomyocytes from diabetic rats, H2154
- effects on intracellular pH and tension in basilar artery of dogs, H1912

Sodium ions

- in rabbit aorta vascular smooth muscle cells, H514

Sodium nitroprusside

- and cerebral vasodilation, H126

Sodium-potassium ATPase

- β -adrenergic modulation of
 - in canine cardiac Purkinje fibers, developmental changes in, H706
 - in neonates and adults, H706
- and cell volume, in rat heart, H94
- in vascular smooth muscle, inhibition, electron probe X-ray microanalysis with, H514

Sodium-potassium-two chloride co-transport

- and cell volume, in rat heart, H94

Somatostatin

- vascular effects, nitric oxide-dependent, H2238

Spectroscopy

- near-infrared, for determination of redox state of cytochrome-c oxidase copper, H579

Splanchnic region

- circulation, in endotoxemia, H1325
- nerve activity in, H1416
- venous congestion, reflex vascular responses to, H1049

Spontaneously hypertensive rats

- adrenergic agonist-induced vasoconstriction in, chronic exercise and, H977
- antihypertensive effect of vasopressin in, cardiac output and, H1728
- aortic myocyte proliferation in, ANG II receptor density and calcium handling during, H2330
- central vasopressin release in, and regulation of cardiovascular response to hypovolemia, H1057
- sodium intake, and development of hypertension, H103

Stomach

- blood flow, effects of hemodilution on, H1849
- mucosal oxygenation, effects of hemodilution on, H1849
- mucosal pH, effects of hemodilution on, H1849

Strain

- intramural, in aorta, change due to smooth muscle contraction and relaxation, H1711
- in isolated cardiomyocytes, H2575
- in rat left ventricle, measurement of, H1256
- residual, H1711

Stress

- analysis, composite nature of heart wall in, H947
- effects on venomotor tone, in rats, H1375
- gravitational, reflex vascular responses to, H1049
- osmotic, in isolated cardiomyocytes, H2575
- psychological, cardiovascular response to, H1375
- residual, H1711

Subarachnoid hemorrhage

- effect on rat basilar artery in vivo, H126

Sudden cardiac death

- prevention, H1491
- protection against, in physically active postmenopausal women, H455

Sulfonyleurea drugs

- gating of cardiac K_{ATP} channels, actin filament disruption and, H2710

Superoxide anion

- and cardiac K_{ATP} channels, H478
- cerebral vasodilation by, H1262
- in FMLP inhibition of acetylcholine-induced vasorelaxation, H2405
- NADH oxidase-derived, vasoactive hydrogen peroxide production from, H1900
- and $PGF_{2\alpha}$ and TxA_2 release in isolated rat heart, H2447

production

- in endothelial cells, H1626
- inhibition by adenosine, H1456
- tetrahydrobiopterin autooxidation and, H738

Sympathetic nervous system

see also **Renal sympathetic nerve activity**

- abdominal visceral afferents, activation during ischemia, H261
- activation, cardiac response to, in transgenic mice overexpressing β_2 -adrenergic receptor, H630
- activity
 - angiotensin II and, in sodium-deprived rats, H2591
 - arteriolar response to, nitric oxide and, H860
 - effects on carotid-cardiac baroreflex, H1363
 - in hypoxia, H2563
 - in postganglionic efferents innervating skeletal muscle vasculature, H38
 - in pulsatile and nonpulsatile systemic circulation, in goats, H15
- cardiac activity, and cardiac hypertrophy, H1547
- exercise-induced discharge, mechanisms of, H38
- muscle activity, dynamics, in advanced heart failure, H1962
- and parasympathetic nervous system, interaction in regulating heart rate, H44, H288
- stimulation, and vasomotor waves, H1416

Sympathetic-parasympathetic interaction

- and heart rate, H44, H288

Systemic inflammatory response syndrome

- circulatory effects, mechanisms, H1325

Systemic vascular resistance

- RSR-13 and, in rats, H602

Systems analysis

- for estimating transfer function from nerve stimulation to heart rate, H288
- of neural baroreflex arc optimization of dynamic arterial pressure regulation, H882

T**Terazosin**

- effects on arteriovenous anastomoses in rabbit ear model of digital perfusion, H2007

Testosterone

- effects on coronary microvascular responses to endothelin-1, H1117

Tetrahydrobiopterin

- and endothelium-dependent contractions in canine basilar artery, H738

Thrombin

- regulation of preproendothelin-1 transcription, H1918

Thromboxane

- TxA_2 release, in isolated rat heart, H2447
- and microcirculation, in rats, H1186

Thromboxane receptors

- TxA_2 , tetrahydrobiopterin autooxidation and, H738

Tolbutamide

response to, in reactive hyperemia in humans, H1594

Transforming growth factor

TGF- β_1 , mRNA, in reduced renal mass hypertension, H120
and 8-epiprostaglandin $F_{2\alpha}$ formation in vascular smooth muscle cells, H159

Transgenic mice

see also **Mice, knockout**

AT-1 cells, sodium current development in, regulation, H541
atrial natriuretic factor, coronary vascular function in, H2368
overexpressing β_2 -adrenergic receptor, cardiac response to sympathetic activation in, H630
overexpressing atrial β_1 -adrenoceptors, decreased heart rate variability in, H1465

Transient outward current

in catecholamine-induced cardiac hypertrophy, H2360
differing contributions in left and right ventricles, H548

Transmembrane potential

changes caused by shocks, in guinea pig papillary muscle, H2536

Transposition of the great arteries

biomechanics of left ventricle in, H1193
pathophysiology, H1193

Troponin C

calcium affinity, Org-30029 effects on, H1829

Tumor necrosis factor

TNF- α , effects on intracellular calcium and contractility in isolated cardiomyocytes, H1449
and microcirculation, in rats, H1186

Tyrosine hydroxylase

in left ventricular hypertrophy, H1547

Tyrosine kinases

in endothelial nitric oxide pathway, H296

U**UK-14304**

effects on arteriovenous anastomoses in rabbit ear model of digital perfusion, H2007

Ultrasound

for portal blood flow measurement in conscious rats, H2701
transit-time, for blood flow measurement, H2701

Upper extremity

forearm
immediate exercise hyperemia, vasodilation and muscle pump contribution to, H1697
vascular resistance, in hypoxia, nitric oxide and, H1182

Uterine artery

expression of angiotensin II receptor subtypes, in pregnancy, H212

Uteroplacental circulation

angiotensin II effects on, and angiotensin II receptor subtype expression, H212

Uterus

fluid balance, C-type natriuretic peptide and, H1565

V**Vagus nerve**

in blood pressure control, H812
in control of atrial repolarization, H870
inhibition of sinus rate, in dogs, H44

Valsalva maneuver

dicrotic notch and mean pulmonary artery pressure during, H1287
microneurography in, H1240

Vanadate

and synthesis of endothelium-derived nitric oxide, H296

Vascular endothelial growth factor

and hydraulic conductivity of microvessels, H2520

induction of NO-dependent hyperpermeability in coronary venules, H2735

microvascular relaxation induced by, in chronically ischemic porcine myocardium, H713

Vascular tone

during functional hyperemia, H387
regulation by nitric oxide, H133
somatostatin-induced changes in, nitric oxide-dependent, H2238

Vasculature

muscular
instability, H2669
modeling of unstable radii in, H2669

Vasoactive intestinal polypeptide

in liposomes, and vasorelaxation in hypertension in situ, H282

Vasoconstriction

adrenergic agonist-induced, chronic exercise and, in spontaneously hypertensive rats, H977

aortic ring, nitric oxide and, H253

coronary

α -adrenergic receptors and, H1302
baroreflex-mediated, parabrachial nucleus and, H1079

and feedback inhibition of nitric oxide release in endothelium, H2045

hypoxic, potentiation by nitric oxide synthase inhibitors, H8

neural, vasopressin-induced, H1307

nitroglycerin-induced, in coronary vasculature, H2447

PMN-induced, inhibition by adenosine, H2622

in rat iris arterioles, H2469

venous, somatostatin-induced, H2238

Vasodilation

see also **Vasorelaxation**

arterial

hypoxia-induced, oxygen-sensitive calcium channels in, H2290

somatostatin-induced, H2238

arteriolar development stimulated by, H753

cerebral

after subarachnoid hemorrhage, H126

by superoxide, hydrogen peroxide, and peroxynitrite, H1262

coronary, nitric oxide-induced, H1584
endothelium-dependent, regulation by nitric oxide, H133

fibroblast growth factor-induced, nitric oxide and, H1087

hypoxic, of resistance vessels in humans, endothelium-derived nitric oxide and, H1182

inward rectifier potassium currents and, H697

maxadilan and, H924

and myocardial oxygen consumption, H1384

pulmonary, perinatal, potassium channels and, H2353

rapid, in exercise hyperemia, H1697
during reactive hyperemia, ATP-sensitive potassium channels and, in humans, H1594

Vasomotor waves

sympathetic-mediated, frequency response characteristics of, H1416

Vasoplegia

endotoxin-induced, heat shock proteins and, H2529

Vasopressin

antihypertensive effect in spontaneous hypertension, cardiac output and, H1728

and hemorrhage in hypertensive rabbits, H1531

and opioids, relationship between, in hypoxia-induced pial artery dilation, H521

reactivity to, in rat pineal arterioles, H1307

Vasopressin receptors

central V_1 , cardiovascular adaptation to hypovolemia and, H1057

central V_2 , cardiovascular adaptation to hypovolemia and, H1057

Vasoreactivity

see **Vasoconstriction**; **Vasodilation**; **Vasorelaxation**

Vasorelaxation

see also **Vasodilation**

acetylcholine-induced, chemotactic peptide and, H2405

coronary, in ANF-transgenic mice, H2368

endothelium-dependent, H296

somatostatin and, H2238

in heart failure, in rats

cAMP-mediated, H2228

cGMP-mediated, H2228

in hypertension, VIP-induced, in situ, H282

intracellular calcium concentration during, H962

membrane potential during, H962

Veins

abdominal, distension, reflex vascular responses to, in dogs, H1049

α_{1B} -adrenergic receptor gene expression in, H1599

relaxations to C-type natriuretic peptide, mechanisms of, H1907

Venoconstriction

in cardiovascular response to stress, H1375

Ventricles

cardiac, see **Heart ventricles**

Ventricular fibrillation

electrical defibrillation for, H1094
in isolated perfused working rabbit heart, H784

onset, recurrent appearance of protective zones at, H1491

Venules

coronary, NO-dependent hyperpermeability, VEGF-induced, H2735

Venules (*continued*)

- inflamed, permeability-related changes at endothelial cell borders in, H2547
- shear-dependent nitric oxide release, H387

Viscoelasticity

- and aortic baroreceptor resetting, H1407

Vitamin E

- and endothelial injury in brain arterioles, H637

Volume expansion

- acute, renal responses to, in heart failure, neural influences on, H1441

W**Water**

- transport, inhibition in vivo, during peritoneal dialysis, H2254

Water channels, see Aquaporin**WB-4101**

- effects in mammalian myocardium, H1423

White blood cells, see Leukocytes**White noise technique**

- for determining dynamic characteristics of neural arc and peripheral arc of baroreflex loop, H882

- for estimating transfer function from nerve stimulation to heart rate, H288

Windkessel model

- three-element, linear and nonlinear formulations of, comparison, H2661
- two-element, reflection function, H1807

X**Xanthine oxidase**

- activity, oxygen free radicals produced by, and cardiac K_{ATP} channels, H478
